Explore diverse research methods and work with other ambitious students

At this international summer school, you will gain research insight in the field of aging. Over three weeks in August, you will meet engaged and highly skilled researchers and work with ambitious students from a wide range of academic backgrounds and countries.

As populations age, we need to understand how more people can preserve their vitality and enjoy a robust older age. You will have the opportunity to explore the aging phenomena through an interdisciplinary lens and an international perspective.

Formats

Lectures, interdisciplinary workshops, presentations, project work in groups, and field trips. The course provides experience with interdisciplinary work and aging research under the supervision of researchers from Center for Healthy Aging at the University of Copenhagen.

Course dates
3 – 21 August 2020 at the University of Copenhagen, Denmark.

Participants
The formal requirement is a completed BA degree and a keen interest in aging research. Please also pay attention to specific language requirements. Learn more at Center for Healthy Aging's website.

Registration
Opens: January 2020
Deadline: 1 April 2020
