PI LUNCH

Thursday 13th of September 2018
12:00 – 13:00
Mærsk Tower, 7.15.122
Lunch is included

Michael Kjær
Clinical Professor
Bispebjerg Hospital
Center for Healthy Aging, Theme III: Energy Level in Humans

Michael’s research focuses on the influence of physical activity on the organism. From a cellular level all the way up to human subjects, he examines the adaptation abilities of tendons and muscles with a specific focus on age related loss of skeletal muscle and degeneration of connective tissue.

Michael prefers wine over beer, and should he describe himself and his career in three words, he would use curiosity, play and collaboration. Michael’s favourite period of his entire scientific career is always the next, and if you want to know why, then come join us for lunch with Michael!

“PI Lunches” provides an opportunity for young researches to meet with Center for Healthy Aging (CEHA) affiliated PIs to discuss career development, personal development and to facilitate networking in an informal setting. PI Lunches are arranged by Network for Young Scholars (NYS) and are for all students, PhDs and post docs at CEHA. Sign up required before 11th of September.
